

California Proposition 65 Compliance statement

May 2022

BBA @raaco.com

As part of our product stewardship and regulatory compliance efforts, we continue to monitor potential regulatory, safety, health, and environmental impact of using our products.

California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, became law in November 1986.

Proposition 65 requires businesses to provide warnings to Californians (and others doing business in the State of California) about significant exposures to chemicals that are known to cause cancer, birth defects or other reproductive harm.

On August 31, 2016, the State of California Office of Environmental Health Hazard Assessment (OEHHA) adopted certain amendments to Article 6, Clear and Reasonable Warnings for California Proposition 65 which become effective on August 30, 2018.

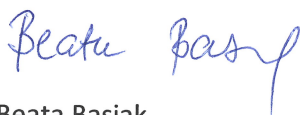

Last update of California Proposition 65 List was published on February 25, 2022.

None of the products manufactured by raaco A/S contain the substances regulated by California Proposition 65 in concentration resulting in exposures above the safe harbor levels determined by OEHHA. As such, our products are not required to have the California Proposition 65 warning labels.

This information is based on our current level of knowledge and covers product as supplied by raaco A/S at the date of issue.

We make no warranties, express or implied, and assume no liability in connection with any use of this information.

Yours faithfully
raaco A/S
