

Inserts - system, compatibility and choice

The flexibility and choices don't just exist within the individual systems, but also between them. The inserts ensure many combinations between the Assorter Boxes in A4, A5 and A6 size, Pocketboxes, CarryLites, Boxxser, Compact, ToolCase and the 250-3 drawers for cabinets.

The wide range of inserts ensures that you can customise your raaco product to suit particular requirements - and just as easily move it again. The inserts and the contents stay in place thanks to a special installation system. Furthermore - it also makes even the smallest items easy to get hold of.

In the illustrations of the individual insert, a field is marked in grey which indicates how much the insert takes up and how it should be placed.

An example of a combination with 3 types of inserts

The illustrations show how many fields each insert cover the bottom of the box.

Inserts for Compact

Whichever Compact you choose, you get a toolbox that can be customized to your needs.

The toolbox can be arranged and divided by movable inserts. These can make it easy to store, and to get a system and overview of the items stored.
